

# The Clinical Effectiveness Platform

## Uncover Actionable Insights Into Your Team's Performance

**SE Healthcare** has developed a unique tool that empowers healthcare providers to assess the performance of your team by asking them a series of questions designed to uncover actionable insights that allow you to:

- Assess your providers' performance
- Uncover underlying risks that may be keeping you from improving operations
- Enhance your practice
- Build stronger relationships with your patients
- Build the foundation for growth

The data and information you collect through the **Clinical Effectiveness Platform** is displayed in an easy-to-navigate dashboard. This dashboard is customizable and allows you to examine your team's individual and collective performances. The info you receive gives you actionable insights into how your team is performing and highlights efforts you can put into place immediately to improve operations. The tool provides the following insights and much more:

- Providers' understanding and adherence to fall risk assessments
- Clinical pathways for change in status
- Policy adherence for medication reconciliation
- Additional, critical metrics specific to your specialty

## How Does It Work?

SE Healthcare's HIPAA-compliant platform is easy to implement. We take care of the set up for you. The navigation is simple and intuitive, and getting started only requires two steps.

- 1 Your team members receive an email survey that takes no more than 10 minutes to complete
- 2 Log in to your Clinical Effectiveness Dashboard to view real-time metrics

### **Eliminating risk leads to enhanced rewards.**

The insights delivered to you through the Clinical Effectiveness Platform can help you eliminate risks within your practice that can lead to legal and other issues. Eliminating those risks and improving operations can lead to rewards such as a boost in your practice's reputation and the ability to negotiate increases in reimbursement. It can also aid in the avoidance of costly litigation brought on by malpractice claims.

## Your Partner In Improving Clinical Effectiveness

SE Healthcare is here to support you throughout the process to make sure you achieve optimal results. It kicks off with a brief 15-minute orientation call to discuss the best way to set up your new account and answer any questions you may have about the onboarding process. Once the orientation is complete, the system will walk you through each step of establishing your account. At that point, your Clinical Effectiveness surveys will begin to be distributed to your providers. Once your data is ready to be viewed, our customer support staff will walk you through how to view your data in your dashboard. Our team is always available during normal business hours to provide you with ongoing support to ensure your success.
